

Tender loving care for body and soul Enjoy life consciously with Softub

Softub

Simple, Comfortable, Efficient :

Waterproof, robust leather-vinyl outerskin Leather-Tex feels very smooth and turns your Softub into a cosy sofa with unlimited seating and stretching possibilities. The basin is made of the extremely durable and insulating foam material called Poly Bond.

The Hydromate is a combined heater/pump unit. During recirculation the water flows around the Hydromate where it is heated by the waste heat of the motor. A clever system of heat recovery provides for low energy consumption.

The water-proof panel helps easily adjust the desired water temperature as well as the intensity of the hydrojets. The system operates through a normal electrical outlet.

Easy Installaton :

1- Position the Softub in the location of your choice

2- Attach the Hydromate to the tub at the connection points

3- Fill the Softub with water. Plug it in and enjoy
